MW POLYMER PRODUCTS LTD.

MW Polymer Products design and produce a range of leakage repair systems, primarily for the Gas and Water Industries. Ecoséal™; an environmentally friendly, non toxic injection repair method for lead yarn and mechanical joints, and Polyform™; an external encasement process, are innovative leak repair systems designed to suit almost any size pipe as well as a variety of pipe joints, couplings, valves, and fittings. Both systems carry a predicted 50 year life and are supported by factory trained, authorized distributors.

NEPTUNE RESEARCH, INC.

Manufacturers of Trident-Seal™ Live Gas Leak Repair and Syntho Glass Riser Composite Reinforcement solutions. Repair kits permanently seal & contain live natural gas leaks on threaded fittings and pinholes on pipes varying from 1/4" to 4" up to & including 60psi. Versatile and live leak tested kits repair virtually any geometry of piping with no shut down, reduced downtime & quick infield repair. Our Syntho-Glass Riser Repair Kit enables quick field reinforcement of corroded & damaged risers up to 80% wall loss to rebuild structural integrity providing a corrosion resistant shield of protection.
