HDPE Fabricated Fittings and Perforated Pipe

The critical elements of time, temperature and fusion pressure for all butt fusion joints on fittings are recorded and retained as a permanent record of quality assurance. All butt fusion joints are stamped with a unique code that can be correlated to its record.

A CNC controlled pipe perforation machine can perforate HDPE or PVC to meet specific project requirements.

HDPE Fabricated Structures

Valve Vault with Dual Containment Piping

Methane Gas Well Covers

Raw Sewage Wetwell

Leachate Manhole
